Response to Amendment

Applicants; amendment filed on June 09, 2004 has been forwarded to the Examiner on June 24, 2004.

Therefore claims 1-27 are currently pending in the Application.

Newly proposed claims 28-31 are cancelled by an Examiner's Amendment (see below).

Reasons for allowance

Claims 1-27 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitation of the dependent claims, in such manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims, which include an in plane switching type liquid crystal display unit having a splay elastic coefficient within the range of 5 to 20 pico-newtons.

It is noted that Applicants' state that in the previous rejection that the Applied reference Yamakita et al (U.S. Published Patent Application No. 2002-0154262) is available as a reference only as of its publication date (October 24, 2002) , however the correct date is earlier because the PCT case (from which the 2002-0154262) claims priority was filed on June 12, 200 and the provisions of Flow chart for 35 U.S.C. Section 102 (e) dates (version 1.0 of Nov. 2002) are only applicable to cases filed on or after November 29, 2000.
